Energy  
Upgrades

# Save on your energy costs and help save the environment

Access discounted energy-efficient products and save between \$500 and \$74,000 a year on your business energy bills with the Victorian Energy Upgrades program\*.

\*Dependent on the size of your business and upgrade/s.

**Install one of the following products in your business and reduce your energy costs:**

general lighting, commercial and industrial lighting, outdoor lighting, street lighting

hot water systems, shower heads, pool pumps, pre-rinse spray valves

heating and cooling, and gas efficiency

measured energy savings for commercial and industrial sites under the M&V method, and motors.

## Participating in the program is easy

### **Step 1.**

Look at the available products.

### **Step 2.**

Choose the products you wish to install to reduce your energy costs.

### **Step 3.**

Engage an accredited provider. You need to work with an accredited provider that is authorised to install VEU energy-efficient products. Accredited providers are also responsible for organising a discount or rebate for any products you choose to install. They will tell you:

- what products you can use
- who can install the products you choose.

## Eligibility

Every Victorian business can take part in the program and be eligible for incentives for energy-efficient products and services.

**Your participation is voluntary.**
