Acknowledgement of Country

We acknowledge and respect Victorian Traditional Owners as the original custodians of Victoria's land and waters, their unique ability to care for Country and deep spiritual connection to it.

We honour Elders past and present whose knowledge and wisdom have ensured the continuation of culture and traditional practices.

We are committed to genuinely partner, and meaningfully engage, with Victoria's Traditional Owners and Aboriginal communities to support the protection of Country, the maintenance of spiritual and cultural practices and their broader aspirations in the 21st century and beyond.

Traditional Owners at the centre of decision-making processes

Strong and mutually beneficial partnerships with Traditional Owners and First Peoples are imperative to the electricity transition's success and integral to ensuring the goals and objectives of self-determination set out in the Victorian Government's Self Determination Reform Framework and the Department of Energy, Environment and Climate Action's (DEECA) *Pupangarli Marnmarnepu 'Owning Our Future' Aboriginal Self-Determination Reform Strategy 2020–2025*.

For more information, visit: deeca.vic.gov.au/aboriginalselfdetermination/self-determination-reform-strategy

Welcome to Victoria's renewable energy sector

At the centre of Australia's electricity network, the state of Victoria is leading the way to a renewable energy future

We estimate that Victoria will need 25 GW of new generation and storage capacity by 2035.¹ Our legislated renewable energy generation, energy storage and emissions reduction targets provide a clear market signal, supported by government programs to drive investment.

The renewable energy sector is at the heart of our economy, identified as a priority growth industry backed by streamlined approval processes, well-developed supply chains, world-class research and development capabilities and a highly skilled workforce.²

A digital and innovation sector positioned for growth

Victoria leads Australia's electricity system digitisation and digitalisation, with near-comprehensive smart meters installed across the state. Rich data sources, open data initiatives, local innovation capabilities and world-class research and development hubs make Victoria a prime destination to create, develop and invest in digital and innovative energy products.

Key government initiatives in this area are boosting growth, including Breakthrough Victoria, LaunchVic, and small-scale renewable technologies programs for households and neighbourhoods such as Solar Victoria's rebates.

The Victorian Government has legislated renewable energy targets of:

¹ Cheaper, cleaner, renewable: our plan for Victoria's electricity future, energy.vic.gov.au/renewable-energy/victorias-electricity-future. Note this figure will be updated following the release of the draft AEMO 2026 Integrated System Plan in December 2025

Why invest in Victoria's digital energy and innovation sectors?

Some of the world's richest energy data

Victoria's near 100% smart meter penetration is among the highest in the world. Rich data made accessible through reforms such as the Consumer Data Right (CDR) make Victoria the ideal location to innovate, test and grow digital energy solutions.

Government underwriting investment

Breakthrough Victoria's providing patient capital and investment to build on Victoria's track record for innovation. It has committed over \$60 million to companies driving the clean energy transition, emissions reduction, and the circular economy.

Fast-growing startup ecosystem

Victoria's startup ecosystem (including startups, scaleups and unicorns) is valued at \$143 billion; it is one of the world's fastest growing ecosystems, home to more than 3,800 start-ups.¹

National funding boosting local capabilities

National investment in innovation is available to support Victorian initiatives, including the \$1.7 billion Future Made in Australia Innovation Fund.

Extensive pipeline of digital talent

Victoria has the fastest growing digital technology sector in Australia, with over 259,000 tech professionals.²

Advanced research and development capabilities

Our world-class universities produce cutting-edge research to innovate and commercialise energy products, including through leading research centres.

¹ launchvic.org/our-ecosystem

² techcouncil.com.au/wp-content/uploads/2022/03/2022-Tech-Jobs-Opportunity-report.pdf

Our digital energy future is backed by data

Victoria is the ideal location to test, develop and deploy new digital solutions, thanks to our world-class energy data and access initiatives.

What makes Victoria's digital energy and innovation subsector different?

Victoria is the only state in Australia with a fully digitised energy system, thanks to the roll-out of over 3.2 million smart meters to residential and small business electricity customers (over 99% coverage).¹

This makes Victoria the ideal place to develop and test new digital energy innovations, with smart meters:

- enabling near real-time remote monitoring of customer electricity flows
- allowing digital energy businesses to provide customers with new product offerings and greater insight into their energy use.

Smart meter coverage around Australia

Open data initiatives

Through DataVic, Victorian Government agencies have published over 5,694 datasets under open licence.

For more information, visit: data.vic.gov.au

The Digital Twin Victoria platform adds interactive 3D and real-time data visualisation, making state-wide spatial data more accessible for innovators, businesses and investors.

For more information, visit: land.vic.gov.au/maps-and-spatial/digital-twin-victoria/dtv-platform

¹ aemc.gov.au/news-centre/media-releases/aemc-finalises-landmark-reform-accelerate-smart-meter-rollout

Exciting market opportunities created by distributed energy resources

Victoria is transitioning to a ‘smarter,’ more resilient and reliable grid, creating exciting market opportunities for digital energy technologies.

Investment opportunities

Distributed energy resources

Next generation technologies (such as smart inverters) enable advanced control and coordination of small-scale generation and storage, efficient electric appliances and electric vehicle charging. The penetration of these technologies continues to grow, creating market opportunities for digital energy service providers. As an example, the potential size of the market for monitoring and analytics photovoltaic (PV) tools in Victoria could reach \$80 million in revenue per year by 2028.¹

Victorian Government initiatives driving market demand

Victorian Energy Upgrades (VEU) Program: In 2025–26, the Victorian Government via Solar Victoria will unlock over \$580 million in discounts for energy upgrades through the VEU program. Legislated to 2045, the VEU program provides discounts for Victorians to move to efficient electric appliances as outlined in Victoria’s Gas Substitution Roadmap.

Discounts are available on a range of appliances and equipment, including hot water, space heating and refrigeration upgrades. Business focused support includes gas efficiency improvements, solar installation and custom upgrades. Households and businesses have taken advantage of discounts available in the Program to move away from gas, with over 48,000 households replacing inefficient gas space heating and over 32,000 households replacing inefficient gas water heating in 2024–25.

For more information, visit: energy.vic.gov.au/victorian-energy-upgrades/homes

Increasing energy generation and storage at home: Solar Victoria’s Solar Homes Program is accelerating the rate at which solar panels and batteries are installed. Since 2018, the Solar Homes Program has supported installation of more than 313,000 solar systems and over 20,000 batteries in Victorian households. This has added more than 2,300 MW of solar capacity and 243 MWh of battery storage capacity. Overall, Victoria already has the third highest capacity of residential PV in Australia at more than 4,000 MW.

For more information, visit: solar.vic.gov.au

The Solar Homes Battery Program closed in June 2025. However, the introduction of the Australian Government’s Cheaper Home Batteries Program from 1 July 2025 offers incentives for home battery installations.

Investment opportunities

Distributed energy resources (continued)

Neighbourhood battery storage

Digital technologies can play a key role in the integration and proliferation of medium scale community and neighbourhood batteries.

Supporting innovative solutions to accelerate the renewable energy transition

Accelerating the energy transition requires a healthy startup ecosystem. The Victorian Government has created several initiatives to support innovation in the energy sector, including digital and renewable technologies.

Victorian Government initiatives driving market demand

Victoria has legislated a sales target of 50% zero emission light vehicles by 2030: Digital technologies will enable the integration of more zero emissions vehicles and electric vehicle chargers.

For more information, visit: energy.vic.gov.au/renewable-energy/zero-emissions-vehicles

100 Neighbourhood Batteries Program: The Victorian Government has committed more than \$37 million to fund installation of 100 neighbourhood batteries across Victoria.

The 100 Neighbourhood Batteries Program provides grants to install neighbourhood batteries (20 kW-5 MW) to improve energy reliability and resilience and provide energy storage capacity for locally generated solar power. This is expected to increase access to renewable energy and help lower energy bills.

For more information, visit: energy.vic.gov.au/100-neighbourhood-batteries

Breakthrough Victoria (BV): BV was launched in 2021 to be a private investment company for Victoria, providing patient capital and investment that impacts the State's economy and wellbeing.

BV provides long-term capital to innovation businesses that will improve people's lives, benefit Victoria's economy and bring together commercial and government partners to build on Victoria's track record for innovation. The fund invests in five priority sectors, including Clean Economy, where it has already committed over \$60 million to companies driving the clean energy transition, emissions reduction, and the circular economy.

For more information, visit: breakthroughvictoria.com

LaunchVic: LaunchVic is the government agency charged with growing Victoria's startup ecosystem, focusing on funding, community-building and global recognition.

LaunchVic, with the Department of Energy, Environment and Climate Action, has delivered two CivVic Labs EnergyTech startup accelerators. These were designed to capitalise on Victoria's unique competitive advantages, helping grow investment-ready local startups and new products at the cutting edge of the energy transition.

For more information, visit: launchvic.org or energy.vic.gov.au/about-energy/news/news-stories/supporting-energy-tech-start-ups

An aerial photograph of Melbourne, Australia, showing a dense urban skyline with numerous skyscrapers and modern buildings. In the foreground, there are lush green parks and a wide, tree-lined street with some traffic. The sky is clear and blue.

Investment opportunities and government funds

Investment Opportunity

Victoria's growing digital and digital energy sectors are creating a wealth of investment opportunities. The following statistics show the pace and scale of growth:

- Australia's growing digital technologies sector is expanding at a rate 4 times faster than the rest of the economy, having grown 26% to \$167 billion since 2020 and expected to reach \$244 billion by 2031¹
- Melbourne is home to more than half of Australia's top 20 technology companies.²

We can connect you with the Australian and Victorian governments' specialist investment vehicles, including:

- Clean Energy Finance Corporation: Australia's 'Green Bank', with access to \$30.5 billion in investment capital from the Australian Government
- Australian Renewable Energy Agency: Provides financial assistance for research, development, demonstration, commercialisation and deployment of renewable energy technologies
- Breakthrough Victoria: was launched in 2021 to be a private investment company for Victoria, providing patient capital and investment that impacts the State's economy and wellbeing.

Access to Victoria's world-class renewable energy talent

Our growing, highly skilled workforce drives project delivery and fosters industry growth. To meet the needs of the sector, the Victorian Government has committed to significant new energy skills and workforce initiatives.

- Delivering the *Victorian Energy Jobs Plan*, which seeks to support Victoria's once-in-a-generation energy transition by setting out actions to mobilise the workforce and grow investment confidence. The Plan identifies key opportunities to support Victoria's energy workforce, which is projected to increase from 41,000 full time equivalent (FTE) to 67,000 FTE in 2040, a 62% increase.
- Delivering the *Women in Energy Strategy*, which seeks to drive significant change for women in energy through Victoria's energy transition, including addressing barriers to increasing the number of women in the energy workforce. The Strategy aligns with the *Victorian Energy Jobs Plan* as well as *Our Equal State*, which seeks to increase participation by women, economic equity, inclusive and safe workplaces, and education opportunities.
- Supporting the establishment of the National Training Centre in New Energy Skills based in Melbourne, in partnership with the Australian Government, to train and reskill key workforces needed for the energy transition across Australia.
- Developing and supporting new energy training pathways through the \$7 million for new Vocational Education and Training (VET) qualifications in renewable energy and utilising the \$50 million TAFE Clean Energy Fund.

World-class education and training

Victoria has a globally renowned education and training system, including:

- 2 global 'Top 40' universities¹
- 8 universities, including 4 dual-sector universities (offering both tertiary and vocational education)
- 12 independent technical and further education (TAFE) institutions under a single TAFE network
- a diverse talent pool with strong growth across the broad range of occupations relevant to the renewable energy sector.

¹ QS World University Rankings, June 2025, topuniversities.com/world-university-rankings

Exceptional research and development capabilities

Victoria boasts a thriving energy research and development sector, with some of the world's top research centres and facilities, including 2 universities in the world's top 40 and 6 within the top 300.¹

Siemens Swinburne Energy Transition Hub

Swinburne University of Technology is home to the Siemens Swinburne Energy Transition Hub, a research and development centre dedicated to accelerating the transition towards a sustainable energy sector, with a focus on achieving net zero targets and promoting the uptake of renewable energy sources.

For more information, visit:
swinburne.edu.au/research/platforms-initiatives/siemens-swinburne-energy-transition-hub

Deakin Digital Design and Engineering Centre (3DEC)

3DEC was established in 2017 by integrating existing multi-disciplinary design and engineering R&D in civil, mechanical, electronics, environmental, renewable energy and electrical engineering disciplines to advance industries that are vital for Australia's social, economic and environmental future including the sustainable energy infrastructure industry.

For more information, visit:
deakin.edu.au/3dec

Powering Victoria's renewable energy future

What is SEC?

SEC is a government-owned renewable energy company that:

- invests in renewable energy and storage projects that accelerate the energy transition and deliver sustainable returns
- retails to government and commercial and industrial businesses
- supports households to go all-electric to reduce their energy bills and emissions
- supports the growth of the renewable energy workforce our energy transition requires.

How SEC invests:

SEC is investing an initial \$1 billion towards delivering 4.5 GW of new renewable energy generation and storage. Its work will ensure Victorian households and businesses continue to have the power they need as we transition to renewable energy.

SEC's investments include opportunities in renewable generation and storage. Utility-scale storage can address critical system gaps and help catalyse investment in large wind and solar generation to replace ageing coal assets.

The organisation will also continue to explore emerging technologies, including long duration energy storage opportunities, that accelerate the sector's maturity by enabling high levels of renewable power generation in the power grid. SEC's investment focus is on achieving sustainable returns while delivering broader benefits to the Victorian public and enabling the market.

For more information, visit: secvictoria.com.au

OFFICIAL

Amber Electric

Amber Electric (Amber) is an innovative energy company giving households access to the real-time wholesale price of electricity and the technology to automate their home batteries and electric vehicles. This allows households to unlock more value from their assets while accelerating the energy transition.

Founded in December 2017 with the goal of using new technologies to benefit customers and build a more sustainable world, Amber is backed by Australia's leading venture capitalists, impact-focused investors and individuals.

Through smart meters, Amber customers can see their detailed electricity usage data in the Amber app, allowing them to shift energy use and be rewarded for using power at cheaper and greener times.

In February 2024 Victorian Government-backed investment fund, Breakthrough Victoria, announced an equity investment of \$4.5m. Since this investment, Amber has grown its customer base to over 43,000 and hired over 40 people taking their total team size to greater than 140.

For more information, visit: amber.com.au

For more information, visit: halsystems.com.au

Key Victorian Government entities

We can help facilitate connections with key Victorian Government entities and industry members across our renewable energy sector.

Department of Energy, Environment and Climate Action (DEECA)

DEECA works with industry and the community to develop Victoria's secure and sustainable energy future.

For information on Victoria's energy policy landscape and facilitated connections across the Victorian Government and renewable energy sector, contact the Business and Industry Engagement team at: BIE@deeca.vic.gov.au

For more information, visit: energy.vic.gov.au/industry/investment-opportunities

Solar Victoria

Solar Victoria is responsible for the delivery of the Victorian Government's \$1.3 billion Solar Homes Program – one of the most ambitious and transformative renewable energy programs in Australia.

For more information, visit: solar.vic.gov.au and energy.vic.gov.au/victorian-energy-upgrades/homes

SEC

SEC is a Victorian Government-owned renewable energy company. It is partnering with the private sector to deliver 4.5 GW of new renewable energy and storage projects with an initial investment of \$1 billion.

For more information, visit: secvictoria.com.au/home

Launch Vic

LaunchVic is Victoria's startup agency, fuelling the growth of Victoria's startup sector by helping startups grow and scale and develop the private early-stage investment landscape.

For more information, visit: launchvic.org

Breakthrough Victoria

Breakthrough Victoria launched in 2021 is a private investment company providing patient capital and investment that impact Victoria's economy and wellbeing.

For more information, visit: breakthroughvictoria.com

Invest Victoria

Invest Victoria is the Victorian Government's investment attraction agency. Services include:

- market regulatory information
- statutory approvals coordination
- site location services
- identification of infrastructure and utility requirements
- advocacy within government.

The Investment Coordinator-General role and function also sits within Invest Victoria, working across agencies to ensure approvals deadlines are met and helping to reduce delays.

For more information, visit: invest.vic.gov.au

Contact a local Victorian Government Trade and Investment Office to help you:

- navigate investment opportunities in Victoria's new energy technology sector
- set up a briefing with energy specialists
- arrange inbound market visits
- introduce you to the Victorian Government's Energy Business and Industry Engagement team and Invest Victoria.

For more information, visit: global.vic.gov.au/meet-our-global-team/all-office-locations
